## LETTER OF TRANSMITTAL

---

Harrisburg, Pa., *December 15, 1929.*

Hon. JAMES F. WOODWARD,  
Secretary of Internal Affairs.

Sir:—

In compliance with the duties of my office, I transmit herewith the 56th Annual Report of the Bureau of Statistics, being a compilation of the statistics for the year 1928 on Productive Industries and Public Utilities, with a section devoted to Miscellaneous Statistics.

Respectfully submitted,

HENRY W. VAN PELT,  
*Director, Bureau of Statistics.*

# TABLE OF CONTENTS

	<i>Page</i>
Foreword by James F. Woodward, Secretary of Internal Affairs .....	1
Composite Exhibit of Productive Industries and Public Service Companies in Pennsylvania. Years 1927 and 1928 .....	3

## PART I—INDUSTRIAL

State, County and Municipal Comparisons for 1927 and 1928, Establishments Reporting, Kinds of Industry, Individuals, Partnerships, Corporations, Average Number Employes, Total Salaried and Wage Employes, Total Wages and Salaries, Capital Invested, Value of Products .....	5-130
State Summary, 1927 and 1928 .....	7
County Comparisons, 1927 and 1928 .....	8-74
Municipal Comparisons, 1927 and 1928 .....	75-130

## PART II—INDUSTRIAL

Summary by Class of Industries Reporting for 1928 .....	131-135
Table No. 1—Number of Establishments, Horsepower, Capital Invested, Value of Production .....	133
Table No. 2—Number of Employes .....	134
Table No. 3—Wages and Salaries .....	135
Classification and Recapitulation of all Industries Reporting for 1928 .....	136-160
Table No. 1—Number of Establishments, Capital Invested, Value of Production .....	136-140
Table No. 2—Number of Employes .....	141-150
Table No. 3—Wages and Salaries .....	151-160
County Summaries by Class of Industry for 1928 .....	162-195

## PART III—INDUSTRIAL

Detailed Tables of Industrial Establishments by Counties and Selected Municipalities for the Year 1928 .....	197-294

Males .....	483-485
Females .....	486-488
Allegheny County—	
Males .....	489-491
Females .....	492-494
Production of Crude Oil in Pennsylvania for the Year 1928 .....	495

## FOREWORD

By JAMES F. WOODWARD

*Secretary of Internal Affairs*

Two years ago, in my foreword to an earlier issue of this report, I called attention to the enviable position occupied by Pennsylvania as an industrial State. In view of the publication by the Federal Government of the results of the Census of Manufactures taken in all States in 1927, I deem it worth while to summarize briefly these more recent figures as they affect the standing of Pennsylvania in relation to other States.

Pennsylvania's manufacturing industries in 1927 provided employment for 11.8 per cent of all wage earners of this class in the United States, and paid to such workers 12.1 per cent of total wages in all manufacturing industries throughout the country. The value of products manufactured in Pennsylvania in 1927 was 10.7 per cent of the national total, second only to New York's share of 15 per cent, and well ahead of Illinois with 8.6 per cent and Ohio with 8.3 per cent. Primary horsepower installed in manufacturing plants in Pennsylvania constituted 14.9 per cent of the total for the United States and was far above that of any other State. At the preceding Census of 1925 the foregoing ratios were slightly more favorable to Pennsylvania than in 1927.

Pennsylvania surpassed all other States in value of output in the following 44 industries: Artificial limbs; artists' and draftsmen's materials; belting, other than leather and rubber, made from purchased fabrics; boxes, cigar, wooden; car and general construction and repairs, steam-railroad repair shops; cardboard, not made in paper mills; carpets and rugs, rag; cars and trucks, mining; castings, rough—brass and bronze; cement; chocolate and cocoa products, not including confectionery; cigars; clay products (other than pottery) and non-clay refractories; coke, not including gas-house coke; compressed and liquefied gases; crucibles; files; flags and banners; galvanizing and other coating, not done in rolling mills; glass; glue and gelatin; haircloth; ice cream; iron and steel—blast furnaces; iron and steel—steel works and rolling mills; jute goods; knit goods; lace goods; lead—bar, pipe and sheet; leather—tanned, curried, and finished; lubricating greases, not made in petroleum refineries; metal-working machinery, other than machine tools; minerals and earths, ground or otherwise treated; plumbers' supplies, not including pipe or vitre-

ous-china sanitary ware; silk manufactures; slate products; smelting and refining zinc; springs, steel—railway, vehicle, heavy machine, etc.; steam engines (except traction engines); structural and ornamental iron and steel work; upholstering materials; waste; wool pulling; wrought pipe, welded and heavy riveted.

In addition to the foregoing list of Pennsylvania "firsts," there are many industries in which this State is surpassed by only one other, among which the following may be mentioned: Beverages; bread and other bakery products; cars, electric and steam-railroad, not built in railroad repair shops; electrical machinery, apparatus and supplies; foundry and machine-shop products; printing and publishing, newspaper and periodical; shirts; woollen goods.

In the present volume several new features have been included, among which are tables ranking the principal cities of the State according to number of industrial employes, wages paid, capital invested in industry, and value of industrial output. These figures disclose that the ten leading Pennsylvania cities, from the standpoint of total wages paid to industrial workers, are Philadelphia, Pittsburgh, Reading, Erie, Allentown, Bethlehem, Johnstown, York, Lancaster and McKeesport. With respect to value of manufactured products, only Philadelphia and Pittsburgh retain the same positions, the ranking of the next eight cities being Braddock, Allentown, Erie, Reading, McKeesport, Lancaster, York and Bethlehem.

Another innovation is a series of tables classifying wage earners according to industries and wage groups, from which it is possible to determine in any industry the relative number of wage earners, either male or female, receiving any given rate of wages. Thus, in 1928, Pennsylvania industries (excluding coal mining) paid 48 per cent of all female wage earners at the rate of \$3.00 and over per day, while 93.8 per cent of all male wage earners were similarly paid. Three male wage earners out of every 100 employed in industry, exclusive of salaried officers and superintendents, received daily wages of \$10.00 and over.

Attention is also directed to a table showing per capita wages of males and females separately, by counties, and in the industrial sections of the book to new columns of statistics showing the horsepower of engines and motors. It is anticipated that the data on horsepower will supply a frequently-expressed demand from engineers and others who desire some means of gauging the character of physical equipment in different classes of industrial establishments.

# PUBLIC UTILITIES IN PENNSYLVANIA <sup>1</sup>

## TRANSPORTATION DEVELOPMENTS

Transportation systems, comprising waterways, stage lines, railroad and electric railways, and more recently motor vehicles and aerial navigation, are primarily for the purpose of moving persons and goods from places of origin to destination. Therefore, in times past when needs were great and facilities meager there was more concern about development than about methods of regulation. At present, however, regulation is, and has been for some years, an issue of the greatest importance, by reason of the rapid growth of transport agencies and the vital part they play in every-day life.

The Pennsylvania Railroad Company, which operates 18.1 per cent or nearly one-sixth of the railroad mileage of the State, has developed from the original 80 miles between Philadelphia and Columbia to a system of 10,467 miles, with assets amounting to about two billions of dollars. On April 13, 1846, a Charter was granted to the Pennsylvania Railroad for the extension of the State-owned railroad from Harrisburg to Pittsburgh, also to New York, as originally contemplated by John Stevens. The capital authorized was seven to ten million dollars. First cars were run through from Philadelphia via Harrisburg to Pittsburgh, December 10, 1850, using the Portage Incline over the Alleghenies, the route of which, long since abandoned as originally operated, was recently properly marked with a monument and fitting ceremonies. The Pennsylvania Railroad completed its own line over the Alleghenies and in 1857, by purchase of the State line from Philadelphia to Columbia, the Company became owner of the entire line from Philadelphia to Pittsburgh.

The process of growth from early days followed much the same lines from East to West—the trader and settler, afoot or by canoe, following the Indian land-trails or streams, the saddle and pack-horse or oxen with the covered wagon, the stage-coach, the canal-boat, and then the railroad, which completely dominated the situation until the advent of the electric trolley car, the gasoline-driven motor and airplane. To-day we find a tendency toward greater coordination between the railroads and the more recent forms of transportation, it being realized that each has its own peculiar place in a well-balanced system of nation-wide transportation.

Returns to the Division of Public Utilities in 1928 from the steam railroads in Pennsylvania show but few changes within the year brought about by mergers, consolidations and abandonments. The railroads through further increased operating efficiency were able to report a gain in net income, despite a drop in gross revenues. These returns cover 12,732 miles of lines operated within the State by 229 companies, as compared with 12,763 miles for 230 roads in 1927. The companies thus reporting are classified as follows:

66 Class "A" companies, whose operating revenues exceed \$100,000;  
40 Class "C" companies, whose operating revenues do not exceed \$100,000; and

123 Class "E" companies, leased to and operated by another company and maintaining a separate legal existence; also keeping financial but not operating accounts.

<sup>1</sup> Prepared by F. C. Gerberich, Chief of the Division of Public Utilities.

The motive power used in the operation of these lines consists of 19,458 locomotives, with 17,641 passenger cars and 828,949 freight cars. Employees numbered 522,603, with a total annual compensation of \$877,232,334. The amount invested in road and equipment is \$5,008,061,656, and assets aggregate \$7,702,958,997, as compared with \$7,522,116,417 in 1927. Total earnings for the year amounted to \$2,175,829,444 compared with \$2,135,252,559 in 1927, or an increase of 1.9 per cent. Railroads are giving increased attention to electrification, not only of terminals but also of main line tracks, programs of this character having been recently announced by the Pennsylvania, Lackawanna and Reading Railroads.

This huge equipment and vast army of employees is the result of development during the past hundred years. If railroad charters are considered, we have now entered the second century of the advent of railroads in Pennsylvania.

#### **Air-Rail Route**

On July 7, 1929, the Pennsylvania Railroad Company began operating a transcontinental air route from New York to California in 48 hours. "Trains by night and planes by day" were announced as the slogan for rapid and safe crossing of the Continent. This announcement is of unusual interest as indicating a policy of coordination of air and rail facilities, which seems likely to prevent unwise and uneconomical competition between these two kinds of transportation. Experience is still lacking but the public's approval seems assured.

#### **Reports to Division of Public Utilities**

The Division of Public Utilities (formerly the Bureau of Railways) has since the adoption of the Constitution confined itself principally to statistics, requiring at first all transportation companies, and now all public service companies, to make detailed reports of all operations each year, to be compiled and published for the general information of the public. There are upwards of 2,000 public service corporations from which reports are collected annually. The number of operating corporations thus reporting gives some idea of the vast amount of labor involved in the compilation of data by this Division for the information of the public.

Reports have been received and are now on file in this Department since 1867. The earliest reports were made to the Auditor General until after the revision of the Constitution, when reports, records, etc., of all transportation companies were authorized to be transferred to the Secretary of Internal Affairs. Many of the old reports thus referred to have become invaluable, as shown by the frequent demands made upon the Department for information contained therein.

#### **Electric Street Railways**

Valuable service is being rendered by our splendid street railway systems, with a trackage of 4,107 miles, representing a book value of \$416,926,601. There are now operating in Pennsylvania 219 companies, which carried 1,270,489,103 passengers during the year 1928. President Warren G. Harding, in addressing a convention of the American Electric Railway Association years ago, said it is a curious phase of human nature that people in populous centers hail transportation lines as a supreme blessing, encourage their construction, celebrate their completion and then growl about them ever after. Rarely does anybody

express appreciation, though genius and efficiency are nowhere more marked in good service, and no one seems to think of their essential character and benefit until traffic is suspended.

### Telephone Companies

Reports from 273 telephone companies made to the Division of Public Utilities for the year 1928 represent 15 fewer companies than reported in 1927, the slight decrease being caused by mergers and consolidations. The generally prosperous condition of these companies indicates the continued expansion of the telephone industry and the necessity of adequate telephone service in our modern business world. A few of the rural companies are still having a hard struggle and will continue to have, unless encouraged and assisted by the public which benefits from their service.

A few summary figures taken from the reports are here shown as compared with the previous year:

	1928	1927	Increase in 1928
Total assets . . . .	\$2,549,281,159	\$2,269,480,141	12.3%
Total liabilities . .	2,242,172,058	2,006,089,397	11.8
Cost of plant and property . . . . .	525,032,891	466,098,583	12.6
Phones in use . .	1,470,888	1,407,620	4.4
Number of employes	29,089	27,997	3.9
Wages paid . . . .	39,546,509	38,451,460	2.8

Further details are shown in the tables found elsewhere in this report.

### Electric Companies

During the year 1928, reports were received from 199 electric light companies, 46 electric heat companies and 170 electric power companies, a total of 415 companies. In our tabulations we find an increase of 12 per cent in the capital invested over 1927, while the number of employes and the compensation paid were slightly lower. Capital invested by electric companies, as reported for 1928, amounted to \$832,510,995, employes numbered 25,635, and their compensation was \$41,167,230. The number of electric consumers in Pennsylvania was given as 2,106,664, sales of electric light, heat and power totaled \$182,911,012, while the quantity sold was 8,084,449,993 kilowatt hours.

### Gas Companies

Reports filed by 137 natural gas companies during 1928 show a combined investment of \$141,391,396, being an increase of 3.3 per cent since 1927. Sixty-six manufactured gas companies filed reports showing an investment of \$179,789,747, being a decrease of 1.2 per cent since 1927. In 1928 there were 7,747 persons employed in the natural gas industry and 6,803 in the manufactured gas industry, a total of 14,550, who received compensation amounting to \$21,624,748. Consumers of natural gas numbered 622,180 and of manufactured gas 847,755, or a total of 1,469,935 consumers for both combined.

### Water Companies

The Division of Public Utilities is now receiving reports from 191 municipal and 435 privately owned water companies, a total of 626 companies. The municipal companies report an investment of \$170,-

172,361, and the private companies an investment of \$200,049,189, or a total of \$370,221,550. The reports further show that 4,248 persons were employed during 1928, who were paid \$5,350,477 in salaries and wages.

Complete tabulations of the electric, gas and water companies will be found elsewhere in this report.

## PRINCIPAL STEAM RAILROADS

The principal railroads of the State may be grouped into two general classes, those operated by well defined systems and by independent companies.

The principal railroad systems operating in the State are:

Baltimore & Ohio  
 Bessemer & Lake Erie  
 Buffalo, Rochester & Pittsburgh  
 Buffalo & Susquehanna  
 Central Railroad of New Jersey  
 Delaware & Hudson  
 Delaware, Lackawanna & Western  
 Erie  
 Lehigh & New England  
 Lehigh Valley  
 Monongahela  
 New York Central  
 New York, Chicago & St. Louis  
 New York, Ontario & Western  
 New York, Susquehanna & Western  
 Pennsylvania  
 Pittsburgh & Lake Erie  
 Pittsburgh & Shawmut  
 Pittsburgh, Shawmut & Northern  
 Pittsburgh & West Virginia  
 Reading Company  
 Union  
 Western Maryland  
 Wilkes-Barre & Eastern

These twenty-four companies operate either by lease or ownership of stock, one hundred and four subsidiary companies, whose lines are wholly or mostly in this State. The following table shows the subsidiary companies controlled and the mileage of each subsidiary company in this and adjoining states:

NOTE.—The number of establishments in the foregoing wage tables does not correspond exactly with the number shown elsewhere in this book, for the reason that an occasional establishment reports wage earners under more than one industry, in which case the establishment will be listed under two different headings. It should also be noted that these tables do not include wage earners in the coal mining industry.

# CRUDE OIL PRODUCTION IN PENNSYLVANIA

## EXHIBIT SHOWING BY COUNTIES THE NUMBER OF BARRELS PRODUCED, NUMBER OF PRODUCING WELLS, AVERAGE ANNUAL PRODUCTION PER WELL, NUMBER OF NEW WELLS BROUGHT IN, AND NUMBER OF OLD WELLS ABANDONED, FOR THE YEAR 1928

County	Production (barrels)	Total number of producing wells	Average annual production per well (barrels)	Number new wells brought in	Number old wells abandoned
Allegheny .....	375,062	1,695	221.3	145	112
Armstrong .....	18,319	180	101.8	3	21
Beaver .....	77,153	869	88.8	10	16
Butler .....	646,942	5,909	109.5	369	495
Clarion .....	189,740	2,445	77.6	217	221
